Graduate Assistance - NEIS Program

We currently have two of your graduates attending our NEIS program.

NEIS is a Commonwealth program for people on New Start benefits. The program assists people in starting up their own business and provides a fortnightly payment to people on the program.

The participants need to complete a six week training course where the participants gain a Cert IV in Small business management. As part of the course, they write a business plan and learn basic small business management. In addition, NEIS provides the participant with 15 months of free business mentoring.

Enclosed you will find a brochure outlining the program and we would encourage any graduate to inquire should they want to participate in one of our training courses (Gosford, City, Granville, Campbelltown, Blue Mts, and Mt Druitt). Also; our website provides an insight to the businesses we have helped.

Thank you for your time.

Sincerely,

Kathy Smith
